End of Life Announcement

Product: BW GasAlertMicro
Regions: Europe, Middle East, Africa & India (EMEAI)

Dear Colleagues

From 1 October 2009 all equipment sold for use in hazardous areas in Europe has to comply with all requirements of the ATEX Directive 94/9/EC (EN 60079-0:2006, EN 60079-11:2007 and EN 60079-26:2007). These requirements are referred to as the EHRs (Essential Health and Safety Requirements).

GasAlertMicro does not meet these requirements and will no longer be shipped by 1 October 2009.

We are pleased to announce the intended release of GasAlertQuattro in September 2009 to replace the GasAlertMicro.

Honeywell Portable Gas Detection product portfolio offers a range of multi-gas portable detectors, including the Impact and the GasAlertMax XT, which cover most features specified by the GasAlertMicro.

Last order and delivery

Last order acceptance date for the GasAlertMicro will be **11 September 2009**.

Last delivery date for the GasAlertMicro will be **28 September 2009**.

Service Support

The GasAlertMicro will continue to be supported with spares until September 2012, and beyond if parts are available and customer needs are still there. Service will continue to provide repair / support services during this time.

Kind regards

Dr. Elisabeth Wasserle
